Poštovane kolegice i kolege,

iznimna mi je čast, u ime organizacijskog odbora, vidjeti vas na 2. nacionalni kongres Hrvatskoga društva za kardijalnu kirurgiju (HDKK). Primarni cilj našeg društva je izgraditi multidisciplinarnu platformu na kojoj će djelovati medicinski profesionalci različitih specijalnosti koji dijele zajednički cilj liječenja bolesnika sa srčanom patologijom.

Nacionalni kongresi HDKK-a održavaju se u dvogodišnjim intervalima, a 2022. godine vas srdačno pozdravljam u Rovinju, od 12-14.05.

Znanstveni program kongresa obuhvaćati će različite strategije djelovanja unutar polja kardijalne kirurgije, s osvrtnom i na perioperacijsku skrb te transkateterske načine liječenja bolesti zalistaka koji se razvijaju paralelno s kirurškim opcijama.

Osobita mi je privilegija što se u sklopu nacionalnog kongresa HDKK-a održava i simpozij Hrvatskoga društva operacijskih sestara. Naše medicinske sestre i tehničari integralni su dio naših timova, te s ponosom zajednički djelujemo u svrhu boljitka naših bolesnika u svakoj etapi njihovog liječenja.

U vjeri da ćete imati priliku kvalitetu znanstvenog sadržaja kongresa upotpuniti i užitkom šetnji kroz Rovinj, pozivam vas da nam se pridružite na 2. nacionalnom kongresu Hrvatskoga društva za kardijalnu kirurgiju te simpoziju Hrvatskog društva operacijskih sestara.

S poštovanjem,

Prof. dr. sc. **Hrvoje Gašparović**, FETCS
Predsjednik,
Hrvatsko društvo za kardijalnu kirurgiju

Dear Colleagues,

On behalf of the Organizing Committee, it is joy and pleasure to see you all in Rovinj, Croatia for the 2nd National Meeting of the Croatian Association for Cardiac surgery. The primary goal of our Association is to provide a joint platform for all medical professionals engaged in the field of cardiac surgery.

The National meetings of the Croatian Association are held biannually, and we are happy to host you this year in beautiful Rovinj, from May 12-14.

The emphasis of the scientific program will be on the contemporary lines of management in the field of cardiac surgery, with focused insights into both perioperative treatment and transcatheter alternatives to conventional surgery.

I am happy to announce that within the National Meeting of the Croatian Association for Cardiac surgery, we will also host a Symposium of operating room nurses and technicians. Our nurses and technicians are an integral component of our cardiac surgical teams and critical in the management of our patients.

Once again, thank you for join us for the National meeting of the Croatian Association for Cardiac surgery and I hope we will enjoy it together.

Sincerely,

Hrvoje Gašparović, M.D., PhD, FETCS
President,
Croatian Association for Cardiac Surgery

- Available in Low Memory Tray and Long Foil Packaging

MERISTEEL™
Steel

- Swaging of suture performed by Laser Welding Technology
- Excellent Needle pull strength
- Composed of 316 LVM providing exceptional Ductility.

Strong enough for you?

EVERPOINT™ Needles

The demands of CABG surgery call for a sharp, strong, bend resistant needle designed for today's cardiovascular interventions—one that stays sharp for every pass, even through unexpected calcium deposits.¹

When EVERPOINT™ needles were launched in 2011, the Tungsten-Rhenium age started for CABG surgery.

EVERPOINT™

- ✓ EVERPOINT™ Cardiovascular Needles showed little increase in penetration force, requiring up to 70% less penetration force over 30 passes compared to currently marketed stainless steel needles.^{1,2,3}
- ✓ EVERPOINT™ Cardiovascular Needles were shown to have up to a 38% increase in strength vs. average conventional stainless steel needles.^{2,3}
- ✓ EVERPOINT™ Cardiovascular Needles were shown to have up to a 121% increase in bend resistance vs. average conventional stainless steel needles.^{2,3}

WHAT IS IT?

EVERPOINT™ is a needle for Cardiovascular surgery shaped from an ultra-high-strength alloy called Tungsten Rhenium and finished with a unique** silicone coating gives EVERPOINT™ Cardiovascular Needles outstanding penetration.¹⁾

WHAT VALUE DOES IT BRING?

The demands of CABG surgery call for a sharp, strong, bend resistant needle designed for today's cardiovascular interventions—one that stays sharp for every pass, even through unexpected calcium deposits.¹

HOW IS IT DONE?

Shaped from an ultra-high-strength alloy called Tungsten Rhenium and finished with a unique** multi-layer silicone coating, EVERPOINT™ Cardiovascular Needles have raised the bar on penetration performance and strength.¹⁾

* BV175-8 competitive equivalents

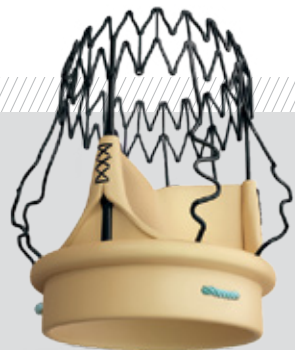

**Proprietary silicone coating method

INTENDED USE/INDICATIONS EUROPE: Perceval/Perceval Plus prosthesis is intended to replace a damaged native aortic heart valve or a malfunctioning aortic prosthesis via open heart surgery. The prosthesis is indicated for use in adult patients suffering from aortic valve stenosis or steno-insufficiency or with a previously implanted aortic valve prosthesis that is no longer functioning adequately and requires replacement. US: The Perceval/Perceval Plus bioprosthesis is indicated for the replacement of diseased, damaged, or malfunctioning native or prosthetic aortic valves. CANADA: The Perceval/Perceval Plus bioprosthesis is intended for use in patients aged ≥ 65 years in which the aortic valve pathology is in an advanced stage to require the replacement of the native or malfunctioning previously implanted prosthesis. AUSTRALIA: Perceval prosthesis is indicated for the replacement of a diseased native or a malfunctioning prosthetic aortic valve via open heart surgery. The prosthesis is indicated in patients who meet the following criteria: 1) subjects of age ≥ 65 years 2) subjects with aortic valve stenosis or steno-insufficiency.

TOP POTENTIAL SIDE EFFECTS Non-structural dysfunction, cardiac conduction disorders, structural valve deterioration, thromboembolism.
MRI conditional For professional use. Instructions for Use are available upon request through the manufacturer's website. Not approved in all geographies. Follow your labeling.
